Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The status of the related applications cited on the first page of the specification should be updated since they are now patented.

2. Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite as it appears incomplete since the claim is directed to a method for modular arithmetic, but fails to recite a modulus and how the modulus is applied to the method, and the combined steps recited in the claims do not constitutes any modular arithmetic.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ovshinsky et al (6.141.241).

Ovshinsky discloses the invention substantially as claimed including providing an input number (S12), resetting a phase change material (S11), applying a number energy pulses equaling the input number to the phase change material (S13-S15), providing energy pulses to

the phase change material to set said phase change material (S21-S23), and counting the number of pulses used in the setting step (S24 and S25) as claimed (see figure 2 and 3). It is noted that Ovshinsky et al. does not specifically disclose “a method of modular arithmetic” recite in the preamble of claim 1. However, since this recitation is only found in the preamble and has no connection to the body of the claim, the recitation is a mere intended of use, and thus is not afford the effect of a distinguishing limitation. Therefore, the claimed invention, to a person of ordinary skill in the art, would have been obvious from the teaching of Ovshinsky.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuong D. Ngo whose telephone number is (571) 272-3731. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
